

TV Repair Shop Risk Assessment Checklist

- Ensure all electrical equipment is regularly inspected and PAT tested.
- Proper storage for faulty TVs awaiting repair.
- Adequate ventilation for soldering and repair work.
- Ensure all tools are in good condition and safely stored.
- Accessible first aid kit and trained personnel.
- Regular training for technicians on updated repair techniques.
- Designated waiting area for customers away from repair areas.
- Functional fire extinguishers and alarms in place.
- Adherence to data protection laws for smart TVs.
- Proper disposal of electronic waste.
- Safe storage of chemicals and solvents used in repairs.
- No smoking signs in repair areas.
- COVID-19 safety measures, if applicable.
- Clearly marked and unblocked emergency exits.
- Use of anti-static precautions when working with circuits.
- Efficient receipt and tracking system for TVs brought in for repair.
- Training for safe lifting of heavy TVs.
- Clear communication on warranty and repair guarantees.
- Ensuring customer data, especially from smart TVs, is erased or protected.
- Regular calibration of diagnostic tools and equipment.
- Provision of protective gear for technicians.
- Secure payment methods and transparent billing.
- Regular audits of equipment and machinery.
- Customer feedback system for continuous improvement.
- Proper inventory and storage of spare parts.
- Adequate insurance cover for potential accidents or damages.

Please remember: these are minimum precautions only and you should check with local regulations; and possibly industry experts; to ensure that you keep safe and stay within the law.
